ANDRÉS CORRAL

Forward Deployed Engineer — AI Automation & Systems Integration
Girardot, Colombia (GMT-5) · andresco70@gmail.com · linkedin.com/in/andrescorral

---

SUMMARY

Embedded Forward Deployed Engineer with 5+ years of hands-on experience designing, deploying, and operating production-grade AI agents, workflow automation platforms, and ERP/CRM integrations inside complex and regulated client environments (UK, Germany, Sweden, US). Specialized in bridging non-technical operational bottlenecks with robust, self-hosted, and cloud infrastructure (Docker, AWS EKS, n8n, PostgreSQL, Claude API / MCP). Proven track record in data extraction/OCR, multi-tenant AI architecture, GDPR/HIPAA-compliant pipelines, and full-lifecycle metric attribution.

CORE SKILLS

- **AI Agents & LLMs:** Claude API (Sonnet / Code / Vision), MCP, Gemini, GPT-4, Multi-Agent Orchestration, RAG & Embeddings
- **Workflow Automation & Integration:** n8n (self-hosted Docker, 120+ workflow migration), Webhooks, Odoo 19 CRM/ERP, Make, Zapier
- **Databases & Storage:** PostgreSQL, Redshift, NocoDB, Airtable, Pinecone, Sanity CMS
- **Infrastructure & DevOps:** AWS (EKS, ECR, Envoy Gateway, IAM Identity Center), Docker, Kubernetes, Helm, external-dns, pnpm monorepos
- **APIs & Protocols:** Meta/Instagram Graph API, LinkedIn Graph/Apify, WhatsApp Business API, Truora, Resend, Publer, Frame.io GraphQL, EvolutionAPI
- **Languages & Web:** Python, TypeScript / JavaScript, SQL, Next.js, React, Node.js, FastAPI
- **Compliance & Governance:** GDPR (Data Processor role), HIPAA compliance, UK ASA/CAP advertising rules, Consent & Eligibility arbitration

PROFESSIONAL EXPERIENCE

Forward Deployed Engineer (FDE) — Adoreal

Managed services & systems for aesthetic clinics portfolio (UK, Germany, Sweden, US) | *Aug 2025 – Present*

- **Multi-Clinic Infrastructure & Systems Integration:** Acted as embedded engineer across a portfolio of 13 clinic clients (including N1, Naples, iQonic), building and deploying custom data, AI, and workflow automation platforms inside each client's environment under GDPR (Data Processor) and HIPAA constraints.
- **Legacy EMR & Un-API'd System Extraction:** Solved no-API legacy integration bottlenecks by building automated OCR extraction pipelines on hardened cloud VMs to extract ~14,000 patient records from Nextech EMR; reverse-engineered internal GraphQL APIs to automate metadata field provisioning across 28 Frame.io projects.
- **Multi-Tenant Social & Content Engine:** Designed and built an automated clinical before/after imagery & social media pipeline (VOS content generation → Python/FFmpeg + Claude Vision API → Airtable → Publer publishing), bypassing third-party AI content filter blocks via compliant BAA/DPIA architectural mapping.
- **Multi-Tenant Email/SMS Lifecycle Activation:** Designed and scoped a consent-aware lifecycle activation system across 13 clinics incorporating a canonical lifecycle state machine, consent/eligibility arbitration, message holdout control groups, and pilot-first 12-week rollouts.
- **Kubernetes & Cloud Infrastructure Deployment:** Deployed and maintained pnpm monorepos (Next.js + Node API + PostgreSQL) to production AWS EKS clusters using Helm, ECR, Envoy

Gateway, external-dns, and IAM Identity Center, independently resolving cluster-auth, VPN, and DNS blockers.
- **Platform Governance & Audit:** Audited a 126-workflow n8n automation platform ahead of a major-version migration (certifying 115 workflows, remediating 11, and eliminating plaintext credential exposures).
- **Metrics Architecture & Internal Enablement:** Defined executive North Star metrics trees (bookings, contactability, CTR, conversion, guardrails, attribution); built logic-teaching platforms (React + Claude API) to enable internal teams to self-serve automation workflows.

Automation Architect & Systems Integrator — Independent / Freelance

Colombia & LATAM | 2023 – Present
- **Odoo 19 ↔ n8n Real-Time Integration:** Built and deployed live webhook integration routing prospect data from Odoo CRM/ERP into n8n automation pipelines for instant multi-channel commercial follow-ups.
- **AI-Driven LinkedIn Prospecting Pipeline:** Engineered an autonomous LinkedIn prospecting workflow combining Claude Sonnet reasoning with Discord as human-in-the-loop review, reducing outreach effort from 45 min to 10 min daily.
- **Multi-Tenant AI Tooling Architecture:** Designed and operated isolated Claude Code CLI deployments (4 client-scoped aliases, separate MCP integrations) delivering strict tenant-isolation across client environments.
- **Multi-Clinic SEO & Autonomous Lead Pipelines:** Built multi-clinic SEO content engines (cascaded AI agents + Pinecone RAG) reducing article generation time from 3h to <10m, and speed-to-lead prospecting pipelines tripling booked meetings.

SR Product & Delivery Manager — Mappa

Jan 2025 – Jan 2026
- Led senior technical product architecture across multi-system initiatives (Atenea, BirdsEye, María, Minos, Nuggets), coordinating engineering and data teams under agile methodologies.

BizOps Automation Specialist — PitsDepot

Sep 2024 – Dec 2024
- Automated billing, inventory, and supplier reconciliation workflows (n8n + Apps Script + Google Sheets), eliminating 4–6 h/day of manual data entry and driving revenue growth from $19K to $30K/month.

QA & Delivery Manager — Fuse (Fintech)

Apr 2024 – Aug 2024
- Implemented Cypress E2E automated testing on Retool platform, reducing deployment testing duration from 45 min to 2 min (-95.6%) and eliminating 50+ pre-production blockers.

Product & Delivery Manager — Talently / Cinemark LATAM / LiciMátic

Mar 2020 – Jul 2023
- Managed cross-functional engineering teams (30+ engineers at Cinemark LATAM across 11 countries; co-founded SaaS platform LiciMátic scaling to 60 enterprise clients).

EDUCATION & CERTIFICATIONS

B.S. Business Administration — Universidad de Cundinamarca (2014 – 2019)
Certifications: Project Management Program · Financial Project Evaluation · Advanced n8n Orchestration Architecture
Languages: English (Professional / Technical C1) · Spanish (Native)
